Maksym Denysov
Software engineer

I am a highly motivated and quality-driven Java Backend Developer with a strong focus on efficiency and continuous improvement. With a proven ability to manage time effectively and handle multiple tasks simultaneously, I excel in fast-paced environments. My expertise lies in developing scalable, reliable, and high-performance backend systems, and I am committed to staying at the forefront of emerging technologies. I possess a strong aptitude for quickly acquiring new skills, tools, and frameworks, ensuring I contribute effectively to innovative and impactful projects.

Education

- 2013 - 2017
  Bachelor of Computer Engineering
  Oles Honchar National University
- 2019 - 2023
  Bachelor of Computer Science
  Alfred Nobel University

Skills

- Java 8, 11, 17
- Spring Boot, Spring Data, Spring Security.
- REST API, SOAP Integration.
- Hibernate(JPA), ORM, JTA.
- Memcached, PostgreSQL, Redis, Elasticsearch, and Liquibase.
- Gradle, Maven, Apache Tomcat.
- PHP, HTML/CSS, JavaScript, JSON, jQuery.
- Linux server.
- OOP, SOLID, Design Patterns, Algorithms, Data structures.
- Git - Github - Gitlab.
- AWS, OCI.
- Kubernetes, Docker.
- TeamCity , Jenkins, Vault.

Languages

- **English - B2**
- **Ukrainian - Native**
- **Russian - Native**
- **Polish - B1**

Professional Experience

01/09/2018 - 01/01/2019 — Dell Inc
Desktop Computer Building Engineer

Key Responsibilities:
- Assembly and Configuration:
- Hardware Testing:
- System Optimization:
- Client Consultation:
- Troubleshooting and Repairs:
- Inventory Management:
- Documentation:

As a Computer Building Engineer, I was responsible for assembling, configuring, and testing custom desktop computers tailored to meet clients' specific needs, ensuring optimal performance, reliability, and user experience.

12/01/2024 - 07/01/2025 — Namecheap
Risk Management Representative

Key Responsibilities:
- Technical Support: Assisted customers with technical inquiries related to shared hosting, VPS, dedicated servers, and domain management.
- Customer Issue Resolution: Addressed and resolved hosting-related issues, including DNS configuration, SSL certificates, website migrations, email setups, and server performance optimizations.

As a member of the Hosting Department Customer Support team at Namecheap, I provided exceptional technical support to customers regarding web hosting services, ensuring prompt and effective resolution of issues related to domains, servers, and websites.

04/15/2025 - present days — Pines Digital
Junior Java Developer

Key Responsibilities:
- Develop backend applications using Java 8/11/17 and Spring Boot.
- Integrate and manage REST APIs
- Work with Hibernate (JPA)
- Collaborate with version control systems Git, GitHub, and GitLab.
- Deploy and manage applications on Linux servers and use tools like Docker and Kubernetes.
- Utilize cloud services like AWS and OCI

As a Junior Java Developer at Pine Digital, I worked as part of a dynamic development team, contributing to the design, development, and maintenance of Java-based applications for diverse clients. I was involved in building back-end solutions, improving application performance, and ensuring code quality in an agile environment.
